Wear Attack

BouGH CC Premium® BouGH CMn MAX®

Wear Attack

Resources Unity offers another breakthrough material technology - WEAR ATTACK.

The technology was created on basis of TouGH CMN, TouGH CC Premium Carbide Liners; brought forward the success of TouGH CMN, TouGH CC Premium series accomplished for the industry.

WEAR ATTACK carries on successful implementation of carbide hard-facing technology on steel casting, where carbide particles are pre-arranged at wear areas to strengthen wear resistance.

Apart from Crushing Lining, WEAR ATTACK technology can be extended to applications to Chute Lining, where High Chromium technology has limitation to improvement till to date.

Please Note: WEAR ATTACK technology is customized solution for wear liners; no universal solution to all by this technology, please consult with Resources Unity service managers and engineers.
