

CAPABILITY STATEMENT

Company Introduction

Resources Unity is a globally registered brand, integrating multiple functional entities in chain management, production management, regional service operations, logistics, and commerce. With a commitment to delivering excellence, we offer a comprehensive range of high-quality equipment, specialized accessories, and wear-resistant materials designed for the mining, oil, and natural gas industries. Our focus is on optimizing operations and ensuring efficiency for clients worldwide, backed by a strong service network that meets the unique demands of these essential sectors.

Mission

Our mission is to ensure that every professional in the Resource sector (including mining, oil & gas and other processing industries) can easily access high-quality equipment and necessary components.

We are dedicated to relentlessly providing the industry with more and better options.

Vision

We see ourselves as the bridge between the production manufacturing end and the final application end. We believe we can connect these two ends, optimize their respective worlds, drive innovation and efficiency across the entire industry, and achieve the best results.

Values

Our goal is to help others and the industries we serve, rather than solely seeking profit; we need to avoid parasitic business practices.

- We keep our promises and take responsibility for our actions.
- Improving organizational efficiency is our true core competitiveness.
- We focus on thoughtful actions, as mere ideas have no value.
- Continuous Learning, Continuous Growth.
- Treat others sincerely, respect one another, be genuine, and avoid fabricating stories.

Group Company Capability

Resources Unity® continuously expands its capabilities both vertically and laterally, ensuring we serve the industry with greater efficiency and effectiveness. In addition to our demonstrated expertise across multiple product lines, we extend our business operations into the following areas:

- Shipping Brokerage – Facilitating seamless logistics and transportation solutions.
- Leasing & Finance – Providing flexible financial solutions tailored to industry needs.
- Consulting Services – Delivering expert advisory services across mining and industrial sectors.

Product Line

Resources Unity® offers a diverse range of product lines, backed by an extensive supply chain and specialized technical teams. Our expertise covers:

- Conveyor Systems
- Crusher Machines
- Grinding Mill Components & Consumables
- Pumps, Piping, and Distributors
- Drill & Raise-boring Tools
- Mining Equipment

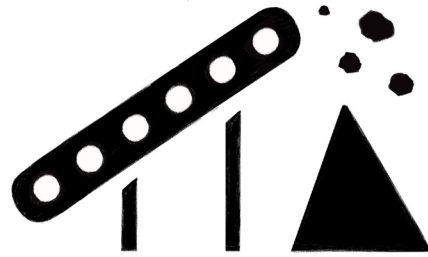

Beyond our core product lines, we have an in-house Material Science Division, which standardizes and develops advanced materials tailored for various equipment applications. This capability allows us to innovate and enhance the performance of our products, ensuring long-term efficiency and durability across all operational environments.

Conveyor System

Resources Unity® offers a comprehensive suite of conveyor system products, including belts, pulleys, and idler packages..

- **Wear Material Science:** We provide a full range of wear-resistant materials tailored to your operational needs.
- **Spares:** Our Bill of Materials (BOM) integrates common-brand spares, ensuring compatibility, simplified procurement, and seamless maintenance.
- **Design:** With advanced engineering capabilities, we can transform your preliminary data sheet into a complete design blueprint.

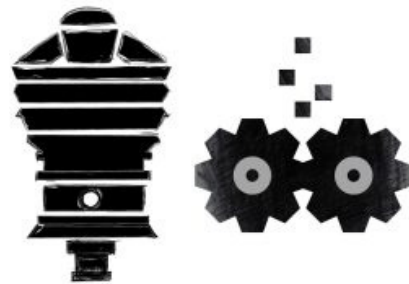

Crusher Machine

We offer flexible supply options, including free-issue machines or leasing arrangements.

Our crushers are designed with compatibility in mind—ensuring that parts remain interchangeable with common-brand alternatives, minimizing downtime and supply chain disruptions.

- **Wear Material Science:** Whether you need a performance increase of 1% or 400%, we guarantee optimal material selection to meet your specific goals.
- **Spares:** All parts are designed for compatibility, ensuring continuous operations even in cases of stock shortages.

Service Capability

- **Third-Party Service Providers:** We partner with reputable regional service providers to ensure quality maintenance and support.
- **Technical Support:** Our expert team offers consultation and technical assistance for equipment troubleshooting and plant de-bottlenecking solutions.
- **Reverse Engineering:** We develop tailor-made solutions by redesigning and optimizing components to meet your exact operational requirements.

Grinding Mill

Resources Unity® specializes in steel casting liners and rubber-steel composite liners, enhanced with advanced wear material technology for superior performance.

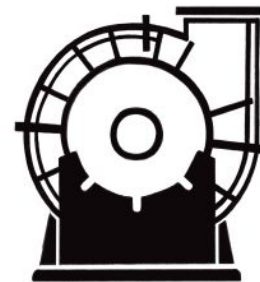

Service Capability

- **Wear Component Analysis:** Utilizing in-mill scanning technology, we provide cross-sectional wear profile analysis to optimize the design of wear components. This includes profiling mill liners, sizing mill balls, and assessing their interaction with ore characteristics and machine operating parameters to ensure maximum efficiency and longevity.

Pumps

We offer flexible supply options, including free-issue machines or leasing arrangements.

Our pumps are designed with compatibility in mind—ensuring that parts remain interchangeable with common-brand alternatives, minimizing downtime and supply chain disruptions.

- **Wear Material Science:** Whether you need a performance increase of 1% or 400%, we guarantee optimal material selection to meet your specific goals.
- **Spares:** All parts are designed for compatibility, ensuring continuous operations even in cases of stock shortages.
- **Premium Bearing Assembly:** The Pump's Bearing Assembly features trusted Timken or SKF Bearings for enhanced reliability and smooth operation.
- **Dependable Electrical Component:** Our Pump incorporates high-quality WEG Electrical Parts to ensure consistent and efficient performance.

Service Capability

- **Complete Pump Solutions:** We provide end-to-end solutions.
- **Pump Rebuild:** We offer on-site supervision or offsite repair or rebuild.
- **Technical Consulting:** We offer de-bottlenecking solution.

Cutter & Drill

Improved performance for parts and assembly construction through ongoing R&D in material upgrades and assembly construction.

- **Raise-bore Cutter Components:** Our cutting-edge Cutter & Drill system includes high-performance Raise-bore Cutter components for efficient and precise excavation in mining operations.
- **Superior Drill Bit:** The Drill Bit in our system is engineered to deliver outstanding drilling performance, providing optimal penetration and durability in various rock formations.
- **Robust Drill Rod:** Our Drill Rod is designed to withstand the rigors of drilling, offering exceptional strength and stability during underground operations.

Chute & Hopper

Resources Unity[®] delivers cost-effective, high-performance material handling solutions designed to optimize efficiency in your operations.

- **Low-Cost Construction:** We provide durable, affordable construction options for chutes and hoppers, ensuring long-term performance with minimal investment.
- **Wear Material Science:** Our expertise in material science allows us to select the most suitable liner materials, providing unmatched durability and efficiency tailored to your specific operational needs.

Service Capability

- **Local Refurbishment:** We offer rapid refurbishment services, ensuring quick turnaround times to minimize downtime and restore equipment to original condition.
- **Ongoing Wear Heat Map Analysis:** Our ongoing wear analysis provides insights into wear patterns, enabling continuous improvements and alignment with changing operating environments. This ensures your equipment stays optimized for maximum efficiency.

Pipeline, Cyclone, Distributors

Perfect solutions for the alignment of manufacturing practices with material selection.

- Wear Material Science: We provide a full range of wear-resistant materials tailored to your operational environment.
- Design: With advanced engineering capabilities, we can transform your preliminary sketches into a complete design blueprint.

Service Capability

Customized Engineering and Design: Our team specializes in providing customized engineering and design solutions to suit your unique material transport needs. Whether it's pipelines or cyclone distributors, we've got you covered.

Resources Unity® Service Scope

With our extensive vertical integration, Resources Unity® is equipped to service a wide range of businesses across various industries. Whether you're a manufacturing company, trading firm, agent, engineering design business, fabrication shop, or end-user, we have the capability to support your needs.
